

FAULENBACH SCHMIEDETECHNIK GMBH

HIGH QUALITY FORGINGS FROM
SPECIAL MATERIALS

FAULENBACH SCHMIEDETECHNIK GMBH

The work that we do is not very widespread. In fact, there may only be a handful of companies who offer the same we do. We specialise in the preparation of high-quality forgings from special materials and concentrate on processing specific alloys, most of which are based on nickel or titanium.

»» QUALITIES THAT MAKE US STRONG

- »» **HIGH QUALITY**
including DIN EN ISO 9001:2008 certification and others
- »» **QUICK AND FLEXIBLE**
through our comprehensive stock of primary materials
- »» **ADHERENCE TO DELIVERY DATES**
with optimum process management
- »» **EXTENSIVE EXPERIENCE**
thanks to a wide variety of industries
- »» **ENORMOUS KNOW-HOW**
in forging and materials engineering
- »» **A HIGH LEVEL OF SPECIALISATION**
in the production of special materials

»» QUALITY MANAGEMENT

In order to meet our high standards of quality, our process operations are continually checked, optimised, and refined.

In addition we have specially qualified employees in house to check the entire product creation process through destructive and non-destructive tests. Standardized key elements here are for example hot tensile tests or notched bar impact tests and ultrasonic tests or penetrant tests.

Furthermore we are among others accredited according to:

- »» **DIN EN ISO 9001:2008**
- »» **KTA 3211.1**
- »» **DGR 97/23/EG-CERTIFICATE**
- »» **AD 2000-MERKBLATT W0**
